**"Whittle's Picks for the Digital Home –  
Exciting Technologies You're Sure to Love"**

Are you enjoying the digital revolution that is transforming your home? In the ideal digital home, PCs and consumer electronic devices are not only protected against Internet security threats, but work together to deliver digital media such as pictures and video and music to the parts of your home where you want it. Enabled by innovation's rapid pace, you can re-invent your lifestyle, waste less time, and have more fun. The possibilities for managing your own digital content and entertainment are more engaging than ever before. You can now take pictures and videos with digital cameras and camcorders, add your choice of background music, and moments later share them with family and friends via e-mail or CD or even by DVD, displayed on our television sets in "home theaters."

On Saturday, November 17<sup>th</sup>, 2006, at the Fairfax County Government Center, Conference Center Rm 1/2, the Washington Area Computer User Group and the National Capital Technology and Computer User's Group are hosting a presentation by David B. Whittle, author of "Cyberspace: The Human Dimension" and named by Working Woman Magazine as "one of America's most original technological thinkers." Dave's been a leader in the PC revolution since 1979, and an opinion-leader in the PC industry since his days as OS/2 Evangelist at IBM in the early '90s. Most recently, he's been writing for *Smart Computing*. Now he's bringing to you his favorite discoveries from recent trade shows in order to show new products that open up new horizons of possibility or solve problems you might be facing.

Would you like a brief look at the latest gadgets, goodies, software, and services available for the digital home? Would you like to have software that takes your digital photos and video footage and almost magically transforms it into a movie on DVD or CD that is a surprising delight to watch? Most importantly, do you ever feel as if there is more to know about Internet security than you're being told? Are you tired of being your own Internet security expert? Would you be interested in a service that brings, for a very reasonable monthly fee, comprehensive Internet security to your PC and identity theft insurance and peace of mind to you? If you answered yes to any of these questions, then you won't want to miss Dave Whittle's presentation at our next monthly meeting!

Dave will introduce some of his favorite technologies, products, and services that solve real problems for real people and can help make life a little bit or a lot better for each of us. "Whittle's Picks" are hidden gems from companies large and small, old and new, with outstanding, innovative offerings -- including muvee™ Technologies ([www.muvee.com](http://www.muvee.com)) and the Invisus PC Security Solution ([myinvisusdirect.com/usergroups](http://myinvisusdirect.com/usergroups)). See exciting new possibilities from these companies and learn how the digital revolution can enhance your life. You will come away from this meeting entertained and informed. Dave will provide time for questions and will bring valuable door prizes, informative handouts, and actual product for sale at significantly discounted prices arranged exclusively for user groups. If you'd like to take advantage of these special prices at the meeting and take product home with you, remember to bring cash, check, or a credit card. See you then!
